

Project P02 - Unified CRM and Customer 360

ID: P02 | version: v1 | asset_type: project | language: en
sector: Retail / E-commerce | duration: 12 months
stack: GCP, BigQuery, Sales Cloud, Talend

Client

Retail and e-commerce brand B

Description

Consolidation of ERP, e-commerce, marketing and support data into a single enriched warehouse.

Measurable result

Campaign conversion up 25%

Context

Brand sold through stores, web and marketplaces with customer data scattered across ERP, e-commerce, marketing and support tools.

Challenges

Duplicate customers, inconsistent identifiers and no shared view for sales and marketing.

Solution

Unified BigQuery warehouse with matching rules, enriched customer profiles and a two-way sync with Sales Cloud.

Deliverables

- Customer 360 data model
- ETL pipelines
- Sales Cloud integration
- Customer KPI dashboards

Team

- C02 - Sarra Mezghani - ETL developer
- C08 - Julien Marchetti - Data platform architect
- C15 - Sophie Delattre - CRM architect
- C20 - Elodie Bertrand - Project manager
