

Project P07 - Multi-brand Marketing Automation

ID: P07 | version: v1 | asset_type: project | language: en

sector: Fashion | duration: 8 months

stack: Marketing Cloud, Snowflake, n8n, SQL

Client

Ready-to-wear group G

Description

Segmentation, automated customer journeys and audience feeds from the data platform.

Measurable result

Open rate up 18%

Context

Ready-to-wear group running separate newsletters and campaigns for five brands.

Challenges

Inconsistent segments across brands and manual audience exports.

Solution

Shared segmentation in Snowflake, automated audience feeds through n8n and Journey Builder journeys per brand.

Deliverables

- Segmentation model
- Automated audience feeds
- Journey Builder flows
- Campaign performance report

Team

- C17 - Camille Roussel - Marketing Cloud consultant
