

Project P12 - Energy Operations Steering

ID: P12 | version: v1 | asset_type: project | language: en
sector: Energy | duration: 8 months
stack: Qlik Sense, Azure, SQL, Python

Client

Energy company L

Description

Operations dashboards, performance indicators and threshold alerts.

Measurable result

Monthly reporting 90% automated

Context

Energy company tracking operations performance through manually assembled monthly reports.

Challenges

Heterogeneous data sources and late detection of performance drifts.

Solution

Qlik Sense dashboards on a governed Azure data layer with threshold-based alerts and scripted loads.

Deliverables

- Qlik Sense dashboards
- Automated data loads
- Threshold alerting rules

Team

- C06 - Omar Trabelsi - Qlik developer
