

Project P14 - Back-office Workflow Automation

ID: P14 | version: v1 | asset_type: project | language: en

sector: Insurance | duration: 5 months

stack: Workato, n8n, REST/SOAP APIs, Python

Client

Insurer N

Description

Automation of onboarding, reminders and reconciliations through integration orchestrators.

Measurable result

1,200 hours saved per year

Context

Insurer processing onboarding, reminders and reconciliations through manual back-office tasks.

Challenges

Many small systems, exceptions handled by email and unclear process ownership.

Solution

Workato and n8n workflows with API connectors, exception queues and ownership rules per process.

Deliverables

- Prioritised automation backlog
- Automated workflows
- Exception handling runbook

Team

- C03 - Mathieu Vasseur - Automation consultant
- C20 - Elodie Bertrand - Project manager
