

Project P01 - Real-time Centralised HRIS

ID: P01 | version: v1 | asset_type: project | language: en
sector: HR / Industry | duration: 14 months
stack: MuleSoft, Talend, REST/SOAP APIs

Client

Multinational industrial group A

Description

Bidirectional real-time integration between the HRIS, talent platform and local payroll systems across 8 countries.

Measurable result

Sync errors down 60%

Context

Group with subsidiaries in 8 countries ran separate HR and payroll tools fed by manual nightly exports.

Challenges

Heterogeneous payroll formats, real-time latency targets and country-specific privacy rules.

Solution

API-led integration layer with a canonical employee model, event-driven sync and automated error replay.

Deliverables

- Integration architecture document
- 8 country payroll connectors
- Monitoring dashboard and runbook

Team

- C01 - Karim Belhadj - Lead integration engineer
- C19 - Nabil Al-Mansoori - Enterprise architect
