

Project P13 - ETL to Cloud ELT Migration

ID: P13 | version: v1 | asset_type: project | language: en
sector: E-commerce | duration: 6 months
stack: Talend, Snowflake, dbt, Airflow

Client

E-commerce marketplace M

Description

Legacy pipelines rebuilt as a cloud ELT architecture with data quality checks.

Measurable result

Data operating costs down 30%

Context

Marketplace running legacy ETL jobs with rising costs and fragile nightly batches.

Challenges

Job dependencies, limited testing and slow recovery after failures.

Solution

Migration to Snowflake ELT with dbt models, automated tests and Airflow orchestration.

Deliverables

- Migrated ELT pipelines
- dbt models and tests
- Airflow DAGs
- Cost and run report

Team

- C02 - Sarra Mezghani - Pipeline developer
- C10 - Hamza Jlassi - Junior data engineer
